

James F. Etro (Jim)

Mr. Etro is founder, and CEO of Itri Corporation.

Jim has more than forty-five years of management and leadership experience in the US Navy and then in private enterprise. His most recent experience is in establishing and directing a product and services oriented business. Prior positions in private industry and in the US Navy have allowed him to practice concept development, program planning and funding, technology development, system prototyping, establishing information technology and enterprise systems, and in implementing a line of products. He has also provided operational weather and oceanography support and advice to military and civilian activities in the US and around the world. Mr. Etro is a leader with the skills and the tenacity of purpose to make a vision a reality.

Work Place Experience:

Itri Corporation

1998-Present

CEO.

Itri Corporation is a solutions oriented organization that fuses natural sciences, remote sensing, and information technology into products that solve problems. The Company provides consulting services to commercial and government customers, does special data collections, and produces a unique remote sensing system for clients known as the Hawk-Eye™ System. The System, by exploiting the Internet of Things enables plants to ‘talk’ to growers and agronomists, and to actuate their equipment.

Agrarius LLC

2005-2011

Founder and Chief Executive Officer.

Agrarius LLC, developed and commercialized an innovative enterprise solution for agricultural managers. Pertinent agricultural data and information and a unique application of a remotely piloted aerial vehicle and remote sensing technologies were fused in a single web-based data management and visualization tool to provide a hawk’s-eye view of Agrarius LLC was merged into Itri Corporation in 2011.
